**Caller identification information provision method used in mobile telephone network, involves forwarding picture caller identification information associated with caller, to called party**

**Original Titles:**

Method and apparatus for providing images for **caller identification** over a mobile network

**Alerting Abstract** ...a call from a caller using mobile telephone handsets (102A,102B), is received. The picture **caller identification** information associated with the caller, is identified by the processor. The picture **caller identification** information of the caller, is forwarded to the called party.

... USE - For providing picture caller identification information over mobile network.

... .. ADVANTAGE - Enables transmission of caller's image along with caller identification information.

**Original Publication Data by Authority**

...

**Claims:**

party;identifying caller identification information associated with the caller;retrieving the caller identification information associated with the caller; andforwarding the caller identification information to the **called party**.>

**Inventor:** OUYA TAKANOBU

**Applicant:** KONETTO KK

**Application No.:** 09-342975 [JP 97342975]

**Filed:** December 12, 1997 (19971212)

**ABSTRACT**

...is provided with a voice mail center device 30 for converting a transmission destination identification symbol and a **caller identification symbol** inputted by a telephone set 20 to the text data of electronic mail when the transmission destination identification symbol, **caller identification symbol** and message are transmitted, converting the message to a voice file and storing the **caller identification symbol** and message into the mail box designated by the transmission identification symbol of the host...

**Video caller identification system, has multi channel radio frequency box that generates caller identification video signals and video device that displays information on television**

**Original Titles:**

**Video caller identification systems and methods...**

**Alerting Abstract ...NOVELTY** - The system has a **video caller identification circuit (10)** receiving caller identification information from incoming calls of a telephone line (4). The circuit is coupled to a...

**...DESCRIPTION OF DRAWINGS** - The drawing shows a block diagram of the **video caller identification system...** ...10 **Video caller ID circuit...**

**Original Publication Data by Authority**

**Claims:**

What is claimed is:1. A video caller identification system comprising:a television for displaying a **video signal**;one or more telephone lines for receiving one or more incoming telephone calls;a video...

**Video caller identification system displays caller identification information on television, in response to incoming telephone call**

**Original Titles:**

**Video caller identification systems and methods.**

**Alerting Abstract ...DESCRIPTION OF DRAWINGS - The figure shows the video caller identification system...**

**Original Publication Data by Authority**

**Claims:**

A video caller identification system comprising: a television receiving and displaying a plurality of video signals, wherein the television receives a...

**Detailed Description:**

...is received (block 701) by the mobile network interface gateway 603 from the mobile short message center 602. The message is then transferred to the mobile phone instant messenger inter-working server (UTMS) 604. The NIPMS 604 then extracts (block 702) the mobile phone number from the logon request. The MPIMIS 604 then examines the mobile phone number to determine whether the mobile...

**Detailed Description:**

...includes the individual's name and address, the individual's home, business, and/or cellular telephone numbers, and location icons. The location icons indicate graphically the characteristics representing the location or type of telephone number ... home icon indicates that the corresponding telephone number is the individual's home telephone number.

Message center 61 00 represents a unified mailbox through which the user is presented with SMS notification... To view the detailed information, the user selects a message from the scrollable list and message center 61 00 displays the detailed information corresponding to the selected message. The detailed information might include the sender's home, office, 0 and/or cellular **telephone number**, a location **icon** indicating from where the sender sent the message, the sender's e-mail address, the date and time the message was received, etc. Message center 61 00 obtains the detailed information from the

12  
notification message received from network services..

**Specification:** ...minimize data transmission requirements, may be sent with the initialization of a communication. Applications include **video caller identification** schemes. Likewise, the method can provide a "screen saver" or video muting program. Finally, the method can serve as a marketing tool providing an **icon for caller identification**. Brief Description of the Drawing

Other features and advantages of the invention will become apparent... ..detailed description taken together with the drawings in which:

FIG. 1 illustrates a method for **video caller identification**.

FIG. 2 illustrates a method for transmitting data from a database.

FIG. 3 illustrates a...icon).

In this embodiment the method advantageously serves as a one-way or two-way **video caller identification** scheme. For example, telecommunication device users can elect to transmit an identification icon, e.g... ..transmission, the user may store or capture the information for later processing to generate a **caller identification** signature or icon as indicated in step 208. Finally, either the user or vendor may terminate the communication...
